

# Tempest

## Color Reference

Wood is a natural material with inherent variations of color, grain, structure, and mineral components.

These natural variations respond to the color and texture treatments of the finishing process which results in a range of colors and tones around a central median color

The images show the expected color variation for this particular product.

### EXPECTED COLOR VARIATION: ECV4

Reference image of Tempest in Premier 1-bis Grade. Samples of this product may not represent the full range of color variation. The image above is provided to show an overall color impression and variation of tone.
